

React JS

## Fragment

Vs

## Div

## `<div></div>`

NEXT 

React Fragments and divs are both used to group together multiple elements in React.

However, there are some key differences between the two.

NEXT 

A React Fragment  
render multiple  
components without  
cluttering up the DOM.  
A div, will add a div to  
the DOM tree.

NEXT 

React Fragments are faster and more space-efficient than divs because they do not create an extra DOM node.

NEXT 

React Fragments are easier to read and write than divs because they do not require the use of extra wrapping elements.

NEXT 

I am a ReactJS developer with 2.5 years of experience. I am proficient in all aspects of ReactJS development, including building user interfaces, creating reusable components, and integrating with APIs. I am also familiar with other JavaScript libraries.

NEXT

## Fragment vs div

I am a highly motivated and results-oriented developer. I can work independently and as part of a team, and I am always willing to learn new things.

If you are looking for a skilled and experienced ReactJS developer,  
Contact me.
