Pure bulma is a perfect CSS framework for building reusable components from scratch. It's also available in a version dedicated for React with pre-built components.

The screenshot shows the Bulma website homepage. At the top is a navigation bar with links for Docs, Videos, Expo, Love, Backers, Extensions, Book, Blog, and Brand. There are also buttons for Download, Sponsor, and a search bar. The main content area features the heading "Bulma: the modern CSS framework that just works." followed by a description: "Bulma is a free, open source framework that provides ready-to-use frontend components that you can easily combine to build responsive web interfaces." Below this is a green checkmark icon and the text "No CSS knowledge required." A star icon shows 47,474 stars and a download icon shows 894k/month downloads. There is a terminal snippet showing `npm install bulma`. Two buttons are present: "Getting started" and "Download v0.9.4". To the right is a video player with a thumbnail of a man pointing and the text "Why you should use Bulma". Below the video is a small cookie notice that says "Just so you know, this website uses cookies. What are cookies?" with a "Get it!" button.
