# Random User Data API

by nikkiandchris.io

Comprehensive random user data.

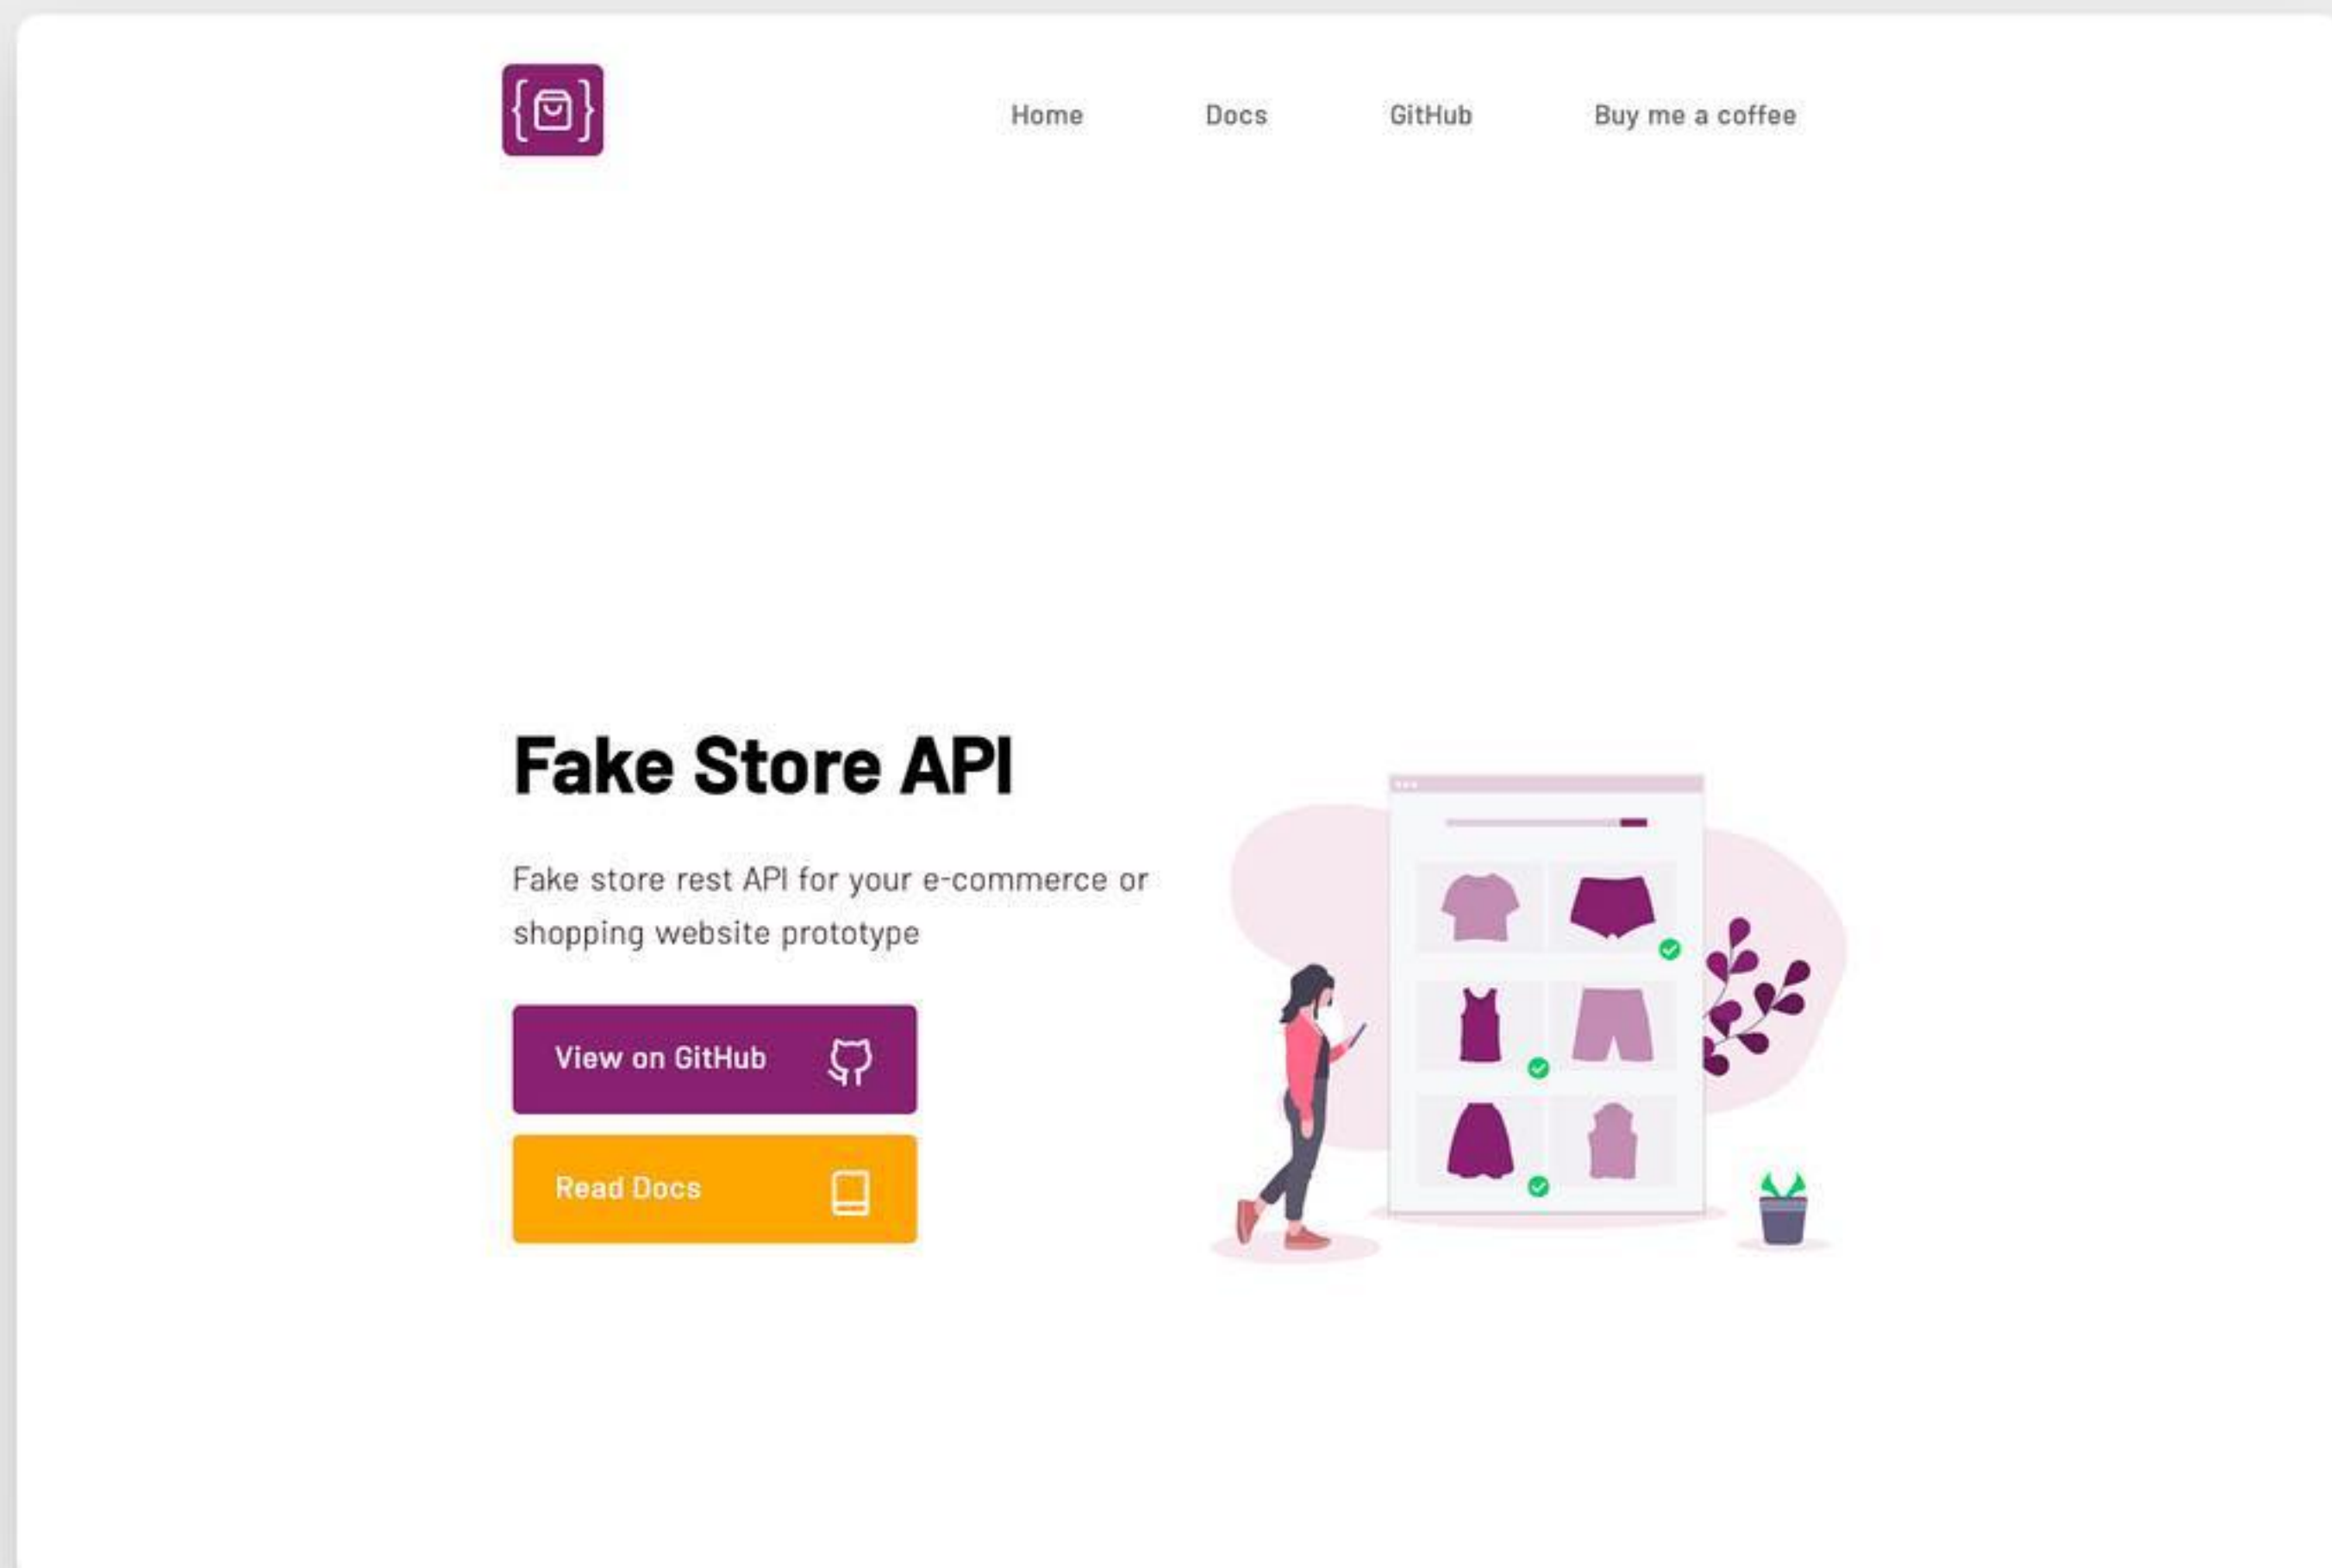

👉 [randomuser.me](https://randomuser.me)

# Fake Store API

by nikkiandchris.io

All the data you need to create  
an eCommerce project.

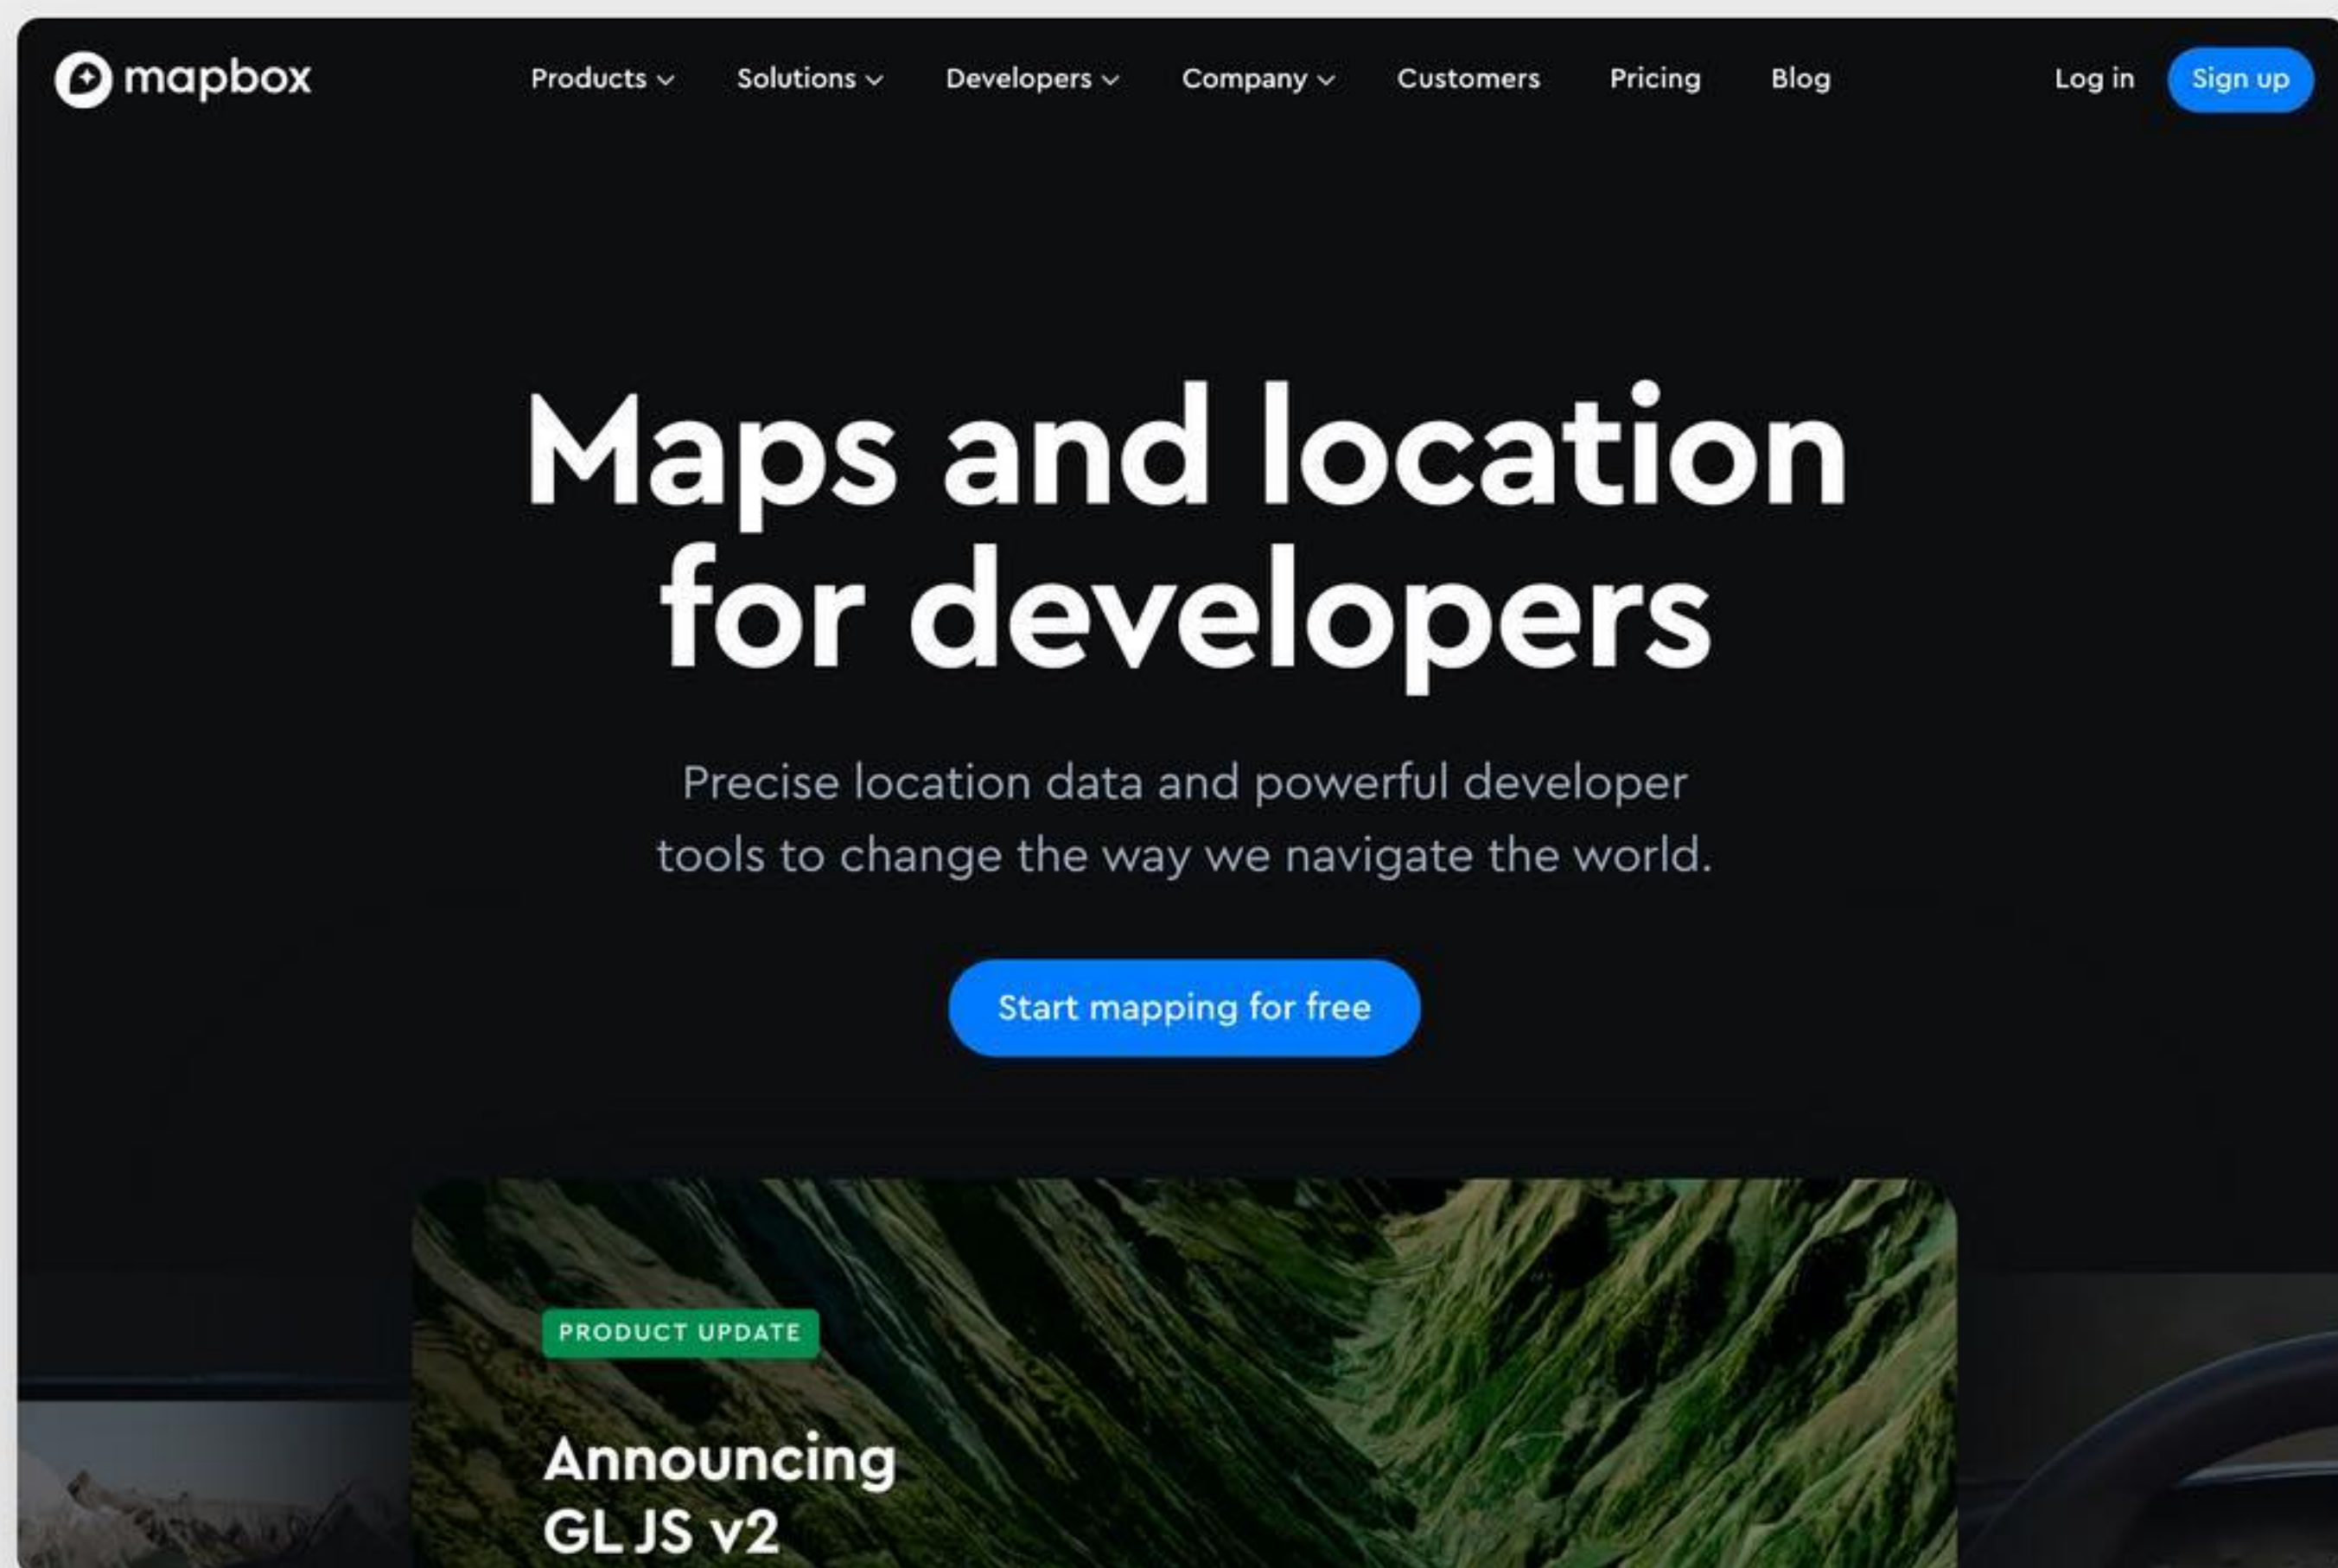

👉 [fakestoreapi.com](https://fakestoreapi.com)

# Mapbox

by nikkiandchris.io

Maps and navigation data for  
location-based apps.

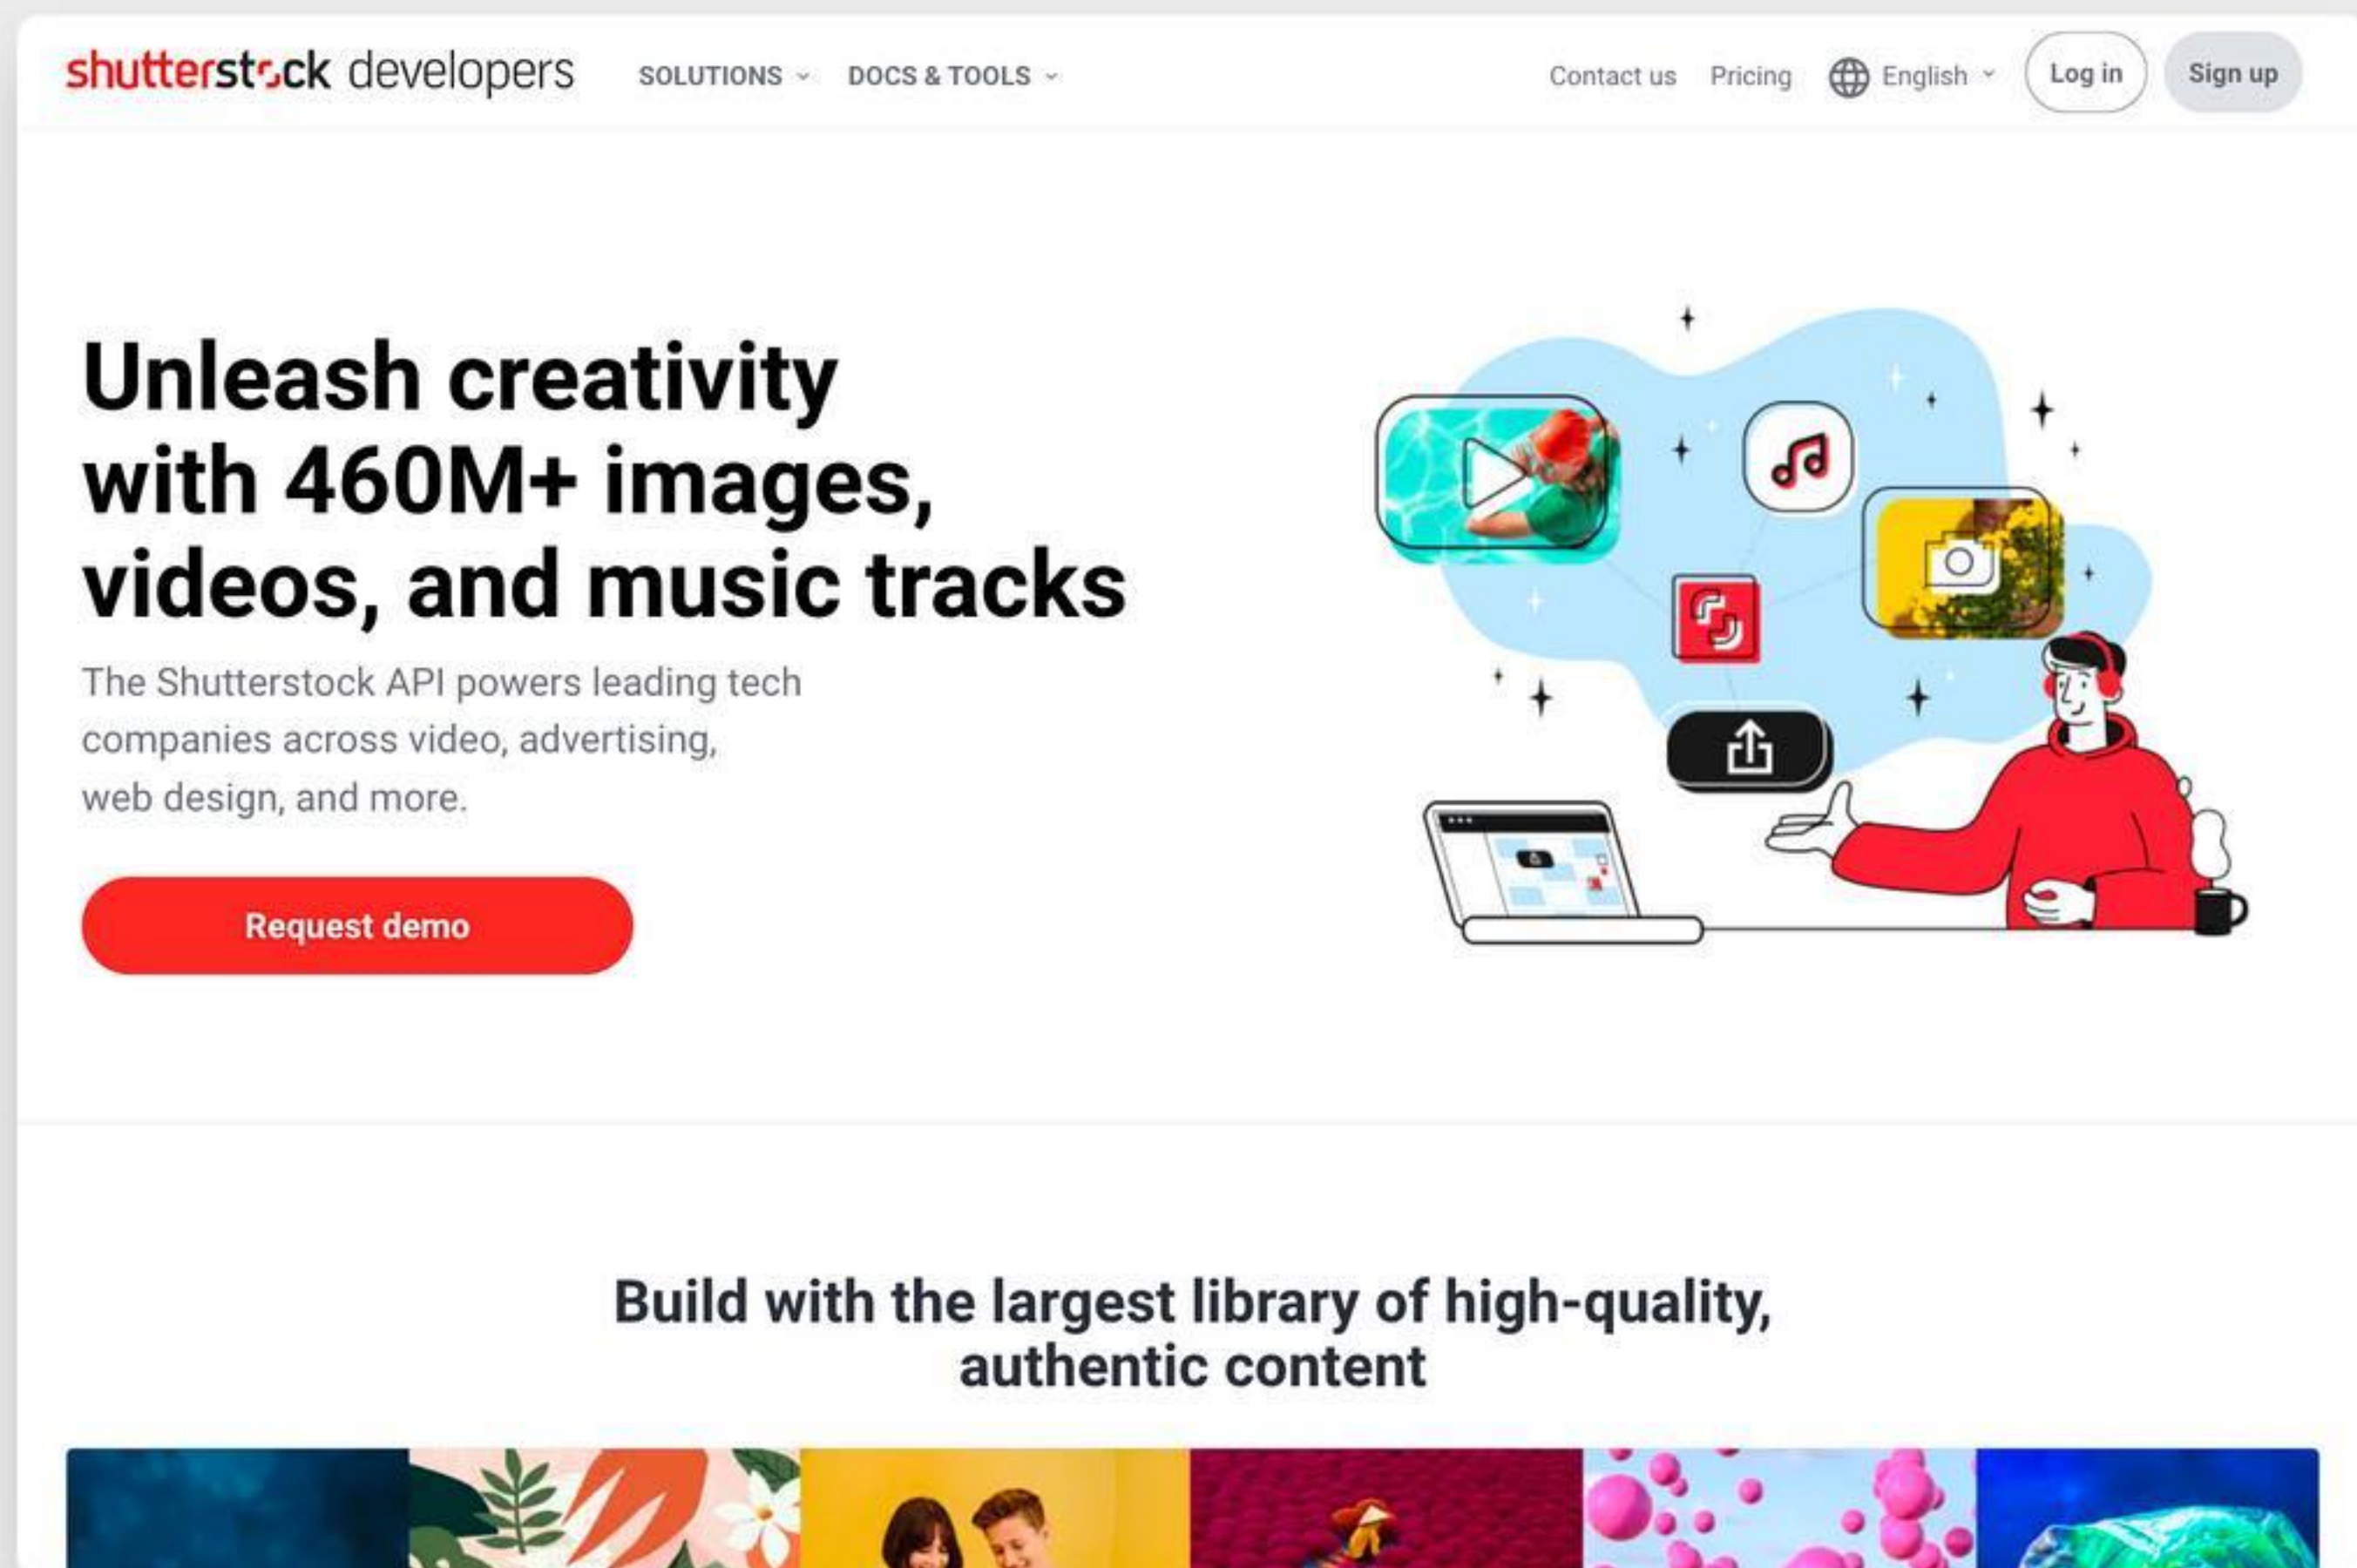

👉 [mapbox.com](https://mapbox.com)

# Shutterstock

by nikkiandchris.io

Free to use images, videos and audio from Shutterstock's API

The screenshot shows the Shutterstock developers page. At the top, the navigation bar includes the 'shutterstock developers' logo, links for 'SOLUTIONS' and 'DOCS & TOOLS', and options for 'Contact us', 'Pricing', 'English', 'Log in', and 'Sign up'. The main content area features the headline 'Unleash creativity with 460M+ images, videos, and music tracks'. Below this, a sub-headline states 'The Shutterstock API powers leading tech companies across video, advertising, web design, and more.' A red 'Request demo' button is positioned below the text. To the right, an illustration depicts a person in a red hoodie sitting at a laptop, with a thought bubble above them containing icons for video, music, and images. At the bottom of the page, a banner reads 'Build with the largest library of high-quality, authentic content' above a row of six diverse, colorful images.

# Serp API

by nikkiandchris.io

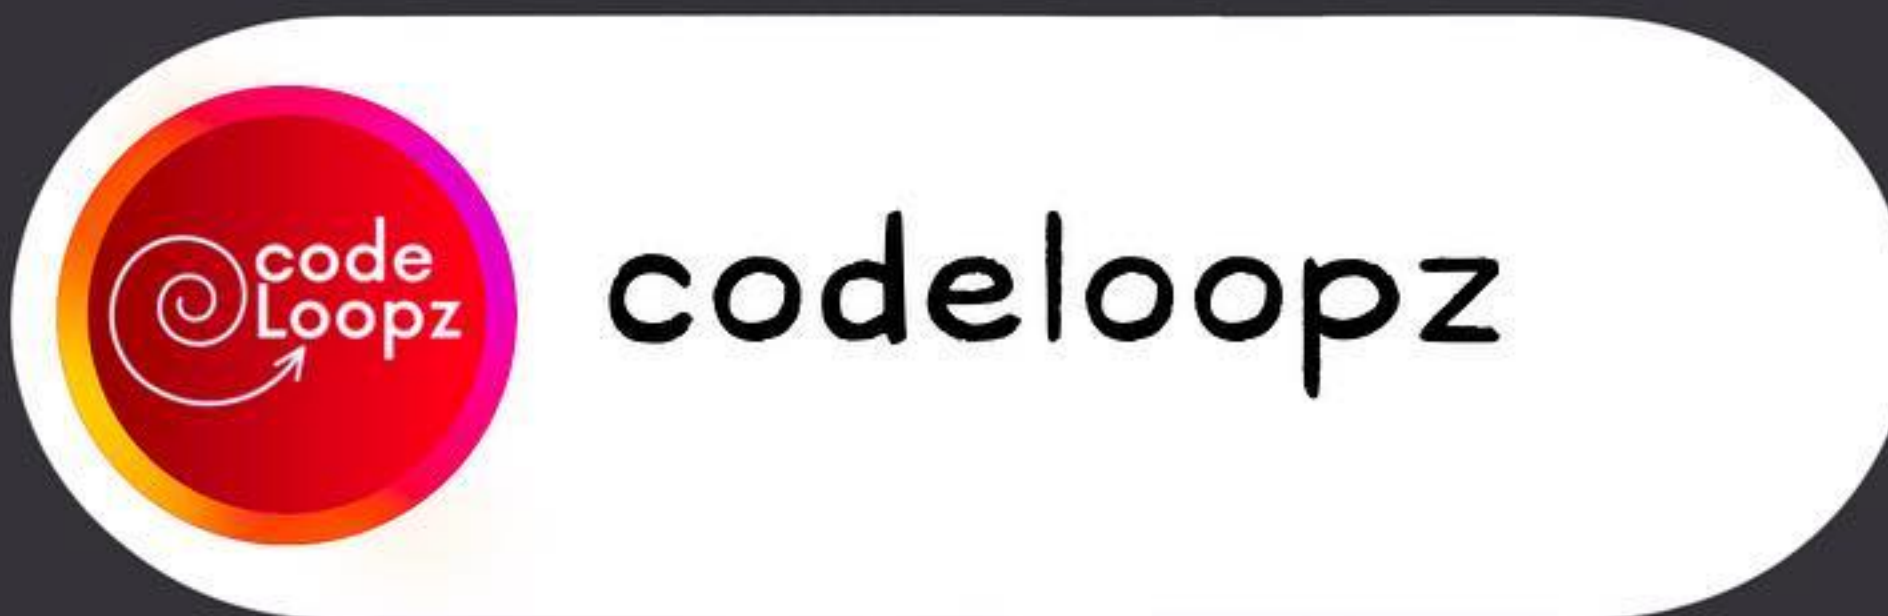

Data from Google and many other popular search engines.

The screenshot shows the SerpApi website with a purple header. The navigation bar includes links for Documentation, Integrations, Features, Pricing, Use cases, Team, FAQ, and Contact us, along with Sign In and Register buttons. The main heading is "Google Search API" with the tagline "Scrape Google and other search engines from our fast, easy, and complete API." Below this is a search interface with a "Search Query" input field containing "Coffee" and a "Location" dropdown menu set to "Austin, Texas, United States". A green "TEST SEARCH" button is to the right. The search results are displayed in a preview of a Google search page, showing a map of coffee shops in Austin and a list of results including Starbucks, Houndstooth Coffee, and Lucky Lab Coffee. To the right of the search results is a JSON response from the API, which includes search metadata, search parameters, and search information.

```
