# animation libraries

## JavaScript

@coding\_\_comics

# GSAP (GreenSock Animation Platform)

URL: [greensock.com](https://greensock.com)

Description: A highly performant and versatile animation library for JavaScript, often used in professional-grade animations.

## Anime.js

URL: [animejs.com](https://animejs.com)

Description: A lightweight and flexible JavaScript animation library with a simple yet powerful API.

**@coding\_\_comics**

## Velocity.js

URL: [velocityjs.org](https://velocityjs.org)

Description: An animation engine with the same API as jQuery's \$.animate(), but with better performance.

## Three.js

URL: [threejs.org](https://threejs.org)

Description: A 3D library that makes WebGL easier to use, often used for creating 3D animations in the browser.

**@coding\_\_comics**

## Popmotion

URL: [popmotion.io](https://popmotion.io)

Description: A functional JavaScript animation library that uses a declarative API for animations.

## Lottie by Airbnb

URL: [airbnb.io/lottie](https://airbnb.io/lottie)

Description: A library for rendering Adobe After Effects animations in real-time.

**@coding\_\_comics**

## **KUTE.js**

URL: [thednp.github.io/kute.js](https://thednp.github.io/kute.js)

Description: A JavaScript animation engine with a focus on SVG morphing and other complex animations.

## **Mo.js**

URL: [mojs.github.io](https://mojs.github.io)

Description: A motion graphics toolbelt for the web that makes complex animations easy.

**@coding\_\_comics**

## Zdog

URL: [zzz.dog](http://zzz.dog)

Description: A pseudo-3D engine for canvas and SVG, good for making simple 3D illustrations and animations.

## Bounce.js

URL: [bouncejs.com](http://bouncejs.com)

Description: A library for generating CSS keyframe animations with a focus on spring physics.

**@coding\_\_comics**

## **Relax.js**

URL: [dixonandmoe.com/relax/](http://dixonandmoe.com/relax/)

Description: A lightweight parallax library that enables parallax scrolling effects.

## **ScrollReveal**

URL: [scrollrevealjs.org](http://scrollrevealjs.org)

Description: A library to animate elements as they scroll into view.

**@coding\_\_comics**

## Vivus

URL: [maxwellito.github.io/vivus](https://maxwellito.github.io/vivus)

Description: A library to animate SVGs, giving them the appearance of being drawn.

## Typed.js

URL: [mattboldt.com/demos/typed-js/](https://mattboldt.com/demos/typed-js/)

Description: A library that types out strings on your screen, useful for text animations.

**@coding\_\_comics**

## **AOS (Animate on Scroll)**

URL: [michalsnik.github.io/aos/](https://michalsnik.github.io/aos/)

Description: A library to animate elements on scroll, providing various animations out-of-the-box.

## **Barba.js**

URL: [barba.js.org](https://barba.js.org)

Description: A library for creating smooth transitions between website pages.
