awesome-react

- A collection of awesome things regarding the React ecosystem.

github.com/enaqx/awesome-react

The screenshot shows the GitHub repository page for `enaqx / awesome-react`. The repository is public and has 20 issues, 136 pull requests, and 1,934 commits. It features 1 branch and 0 tags. The README.md file contains the following content:

```
Awesome React  awesome

A collection of awesome things regarding the React ecosystem.

- React
  - React General Resources
  - React Community
  - React Online Playgrounds
  - React Tutorials
    - React General Tutorials
    - React Hooks

```

The repository has 52.6k stars, 1.6k watching, 6.4k forks, and no releases or packages published.

react-in-patterns

- A free book about design patterns/techniques used while developing with React.

github.com/krasimir/react-in-patterns

The screenshot shows the GitHub repository page for `krasimir/react-in-patterns`. The repository is public and has 878 forks. The master branch has 1 commit and 0 tags. The commit history lists several commits from Krasimir Tsonev, including merges from `chai-jay/master`, fixes for code samples, and initial commits. The repository has 12.1k stars, 298 watchers, and 878 forks. It includes sections for About, Releases, and a list of dependencies: react, patterns, injection, data-flow, and dependency.

About

A free book that talks about design patterns/techniques used while developing with React.

30-Days-Of-React

- 30 Days of React challenge is a step-by-step guide to learning React in 30 days.

github.com/Asabeneh/30-Days-Of-React

The screenshot shows the GitHub repository page for '30-Days-Of-React'. At the top, there's a navigation bar with links for Issues (34), Pull requests (88), Actions, Projects, Security, and Insights. Below the navigation is a dropdown for branches ('master'), a count of 1 branch, and 0 tags. To the right of the dropdown are 'Go to file' and 'Code' buttons. On the far right, there are buttons for Notifications, Fork (4.6k), and Star (17.9k). The main content area displays a list of 271 commits from December 2021. Each commit includes a small icon, the commit message, and the date it was made. To the right of the commit list is an 'About' section containing a detailed description of the challenge, mentioning it's a step-by-step guide to learn React in 30 days, requiring HTML, CSS, and JavaScript knowledge, and noting it may take more than 100 commits. Below the description are several blue circular tags with white text representing technologies: react, redux, javascript, css, html, challenge, website, programming, html5, js, reactjs, webdevelopment, react-router-dom, and 30dayofjavascript. At the bottom of the page, there are links for Readme, stars (17.9k), watching (372), and forks (4.6k).

awesome-react-components

- Curated List of React Components & Libraries.
This is an AWESOME list of components.

github.com/brillout/awesome-react-components

The screenshot shows the GitHub repository page for 'awesome-react-components'. The repository is public and has 2 branches and 0 tags. The master branch has 852 commits. The repository is described as a 'Curated List of React Components & Libraries'. It includes sections for Readme, CC0-1.0 license, Code of conduct, 33.5k stars, 741 watching, and 2.9k forks. The repository has no releases published. The README.md file contains a section titled 'Absolutely Awesome React Components & Libraries' with a note about it being a curated list and not a comprehensive one. It also lists bullet points such as 'It solves a real problem'.

real-world-react-apps

- Real-world React apps and their open-source codebases for developers to learn from.

github.com/jeromedalbert/real-world-react-apps

The screenshot shows the GitHub repository page for 'real-world-react-apps' by 'medalbert'. The repository is public and has 23 commits, 1 branch, and 0 tags. The README.md file contains a section titled 'Real world React apps' with instructions for learning from experienced developers. The repository has 3k stars, 66 watching, and 265 forks. It includes labels for react, javascript, examples, and real-world.
